Task 2 – Build a Mini Interactive JavaScript App Using DOM Manipulation

Project Name : Calculator App

Submitted By: Kashish Saini

Submission Date: 01 July 2026

Project Description

The Professional Calculator is a responsive web application developed using HTML, CSS, and JavaScript. The project demonstrates JavaScript DOM Manipulation by performing real-time arithmetic calculations based on user input. The calculator provides a clean user interface, supports basic mathematical operations, and includes responsive design for different screen sizes.

Objective

To develop a fully functional calculator using JavaScript DOM Manipulation that performs basic arithmetic operations through an interactive user interface.

Technologies Used

- HTML5
- CSS3
- JavaScript (DOM Manipulation)

Features

- Responsive Calculator UI
- Addition, Subtraction, Multiplication & Division
- Percentage Calculation
- Decimal Number Support

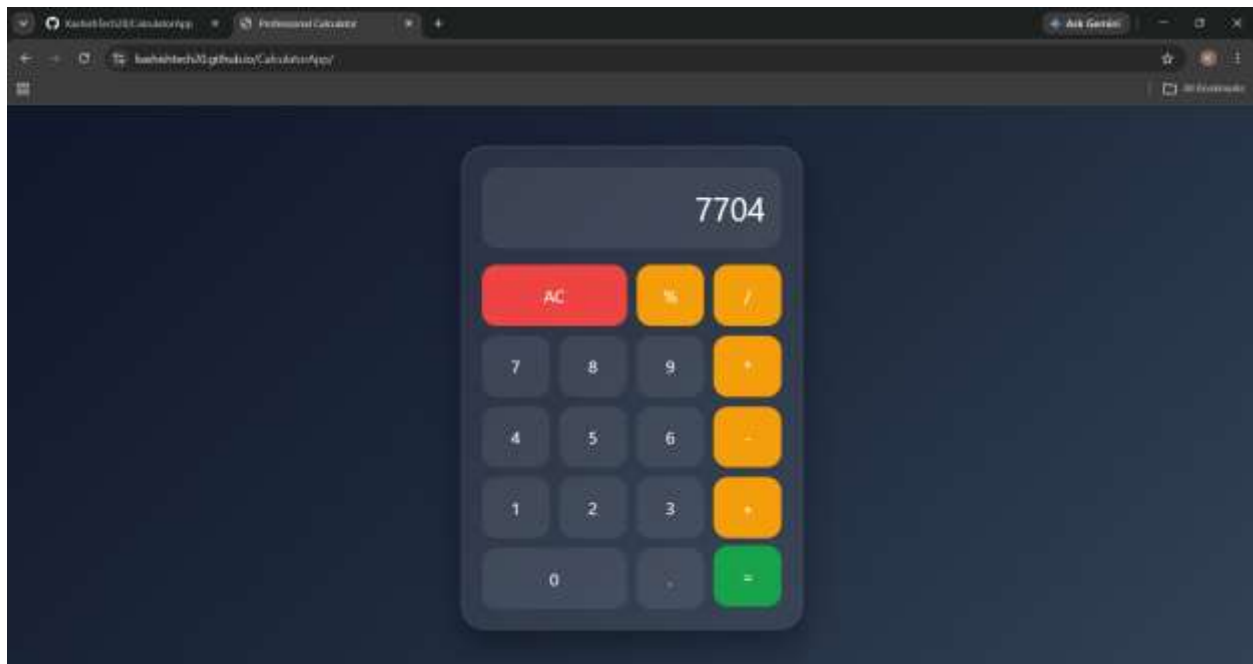

- Interactive Button Click Events

Performing Calculation

Calculator Output

Code Snippets

HTML

```
<input type="text" id="display" readonly>

<div class="buttons">

  <button class="btn clear">AC</button>

  <button class="btn operator">%</button>

  <button class="btn operator">/</button>

</div>
```

CSS

```
.buttons{
```

```
display:grid;

grid-template-columns:repeat(4,1fr);

gap:12px;
}

.btn{

height:75px ;

border-radius:18px;

cursor:pointer;
}
```

JAVASCRIPT

```
else if(value === "="){

    try{

        display.value = eval(display.value);

    }

    catch{

display.value = "Error";

    }

}
```
